

**TLDR: Key takeaways from week one**

- 1. Our view of the world is a model based on outdated and reduced data
- 2. New potential is found by reevaluating not only the data but the rules we hold onto for evaluating the data
- 3. Any new strategic approach needs to be regenerative, constantly observing, evaluating and anticipating change

The 5 things I care about most:

- 1. \_\_\_\_\_
- 2. \_\_\_\_\_
- 3. \_\_\_\_\_
- 4. \_\_\_\_\_
- 5. \_\_\_\_\_

How are they doing?

- 1 \_\_\_\_\_ 5 \_\_\_\_\_ 10
- 1 \_\_\_\_\_ 5 \_\_\_\_\_ 10
- 1 \_\_\_\_\_ 5 \_\_\_\_\_ 10
- 1 \_\_\_\_\_ 5 \_\_\_\_\_ 10
- 1 \_\_\_\_\_ 5 \_\_\_\_\_ 10

How do I know this is true?

- 1. \_\_\_\_\_
- 2. \_\_\_\_\_
- 3. \_\_\_\_\_
- 4. \_\_\_\_\_
- 5. \_\_\_\_\_

**Now ask yourself:**

Vitality: When is the last time I seriously evaluated my evaluation methods?

Diversity: Who could I include to improve accuracy and reliability?

Interdependence: How could I make this more useful and relevant to others?

*Our knowledge is amazing,  
Our ignorance even more so*
